TESLA RENTAL · BERLIN · MUNICH · AMSTERDAM

Rent a Tesla in 5 minutes — and you're on the road

Our own fleet of 7 Tesla EVs: Model 3, Model Y, Model S Plaid, Model X and Cybertruck. Clean, fully charged, comprehensively insured and with free charging at our home station.

Book online

See the fleet

What was built

A four-page static website for a Tesla rental company: English copy, prices in euro, own fleet of seven EVs, booking flow with a live quote — no CMS, no build step, no dependencies.

4

pages: home, fleet, booking, contacts

26

Lucide icons in one inline sprite

7

Tesla models with studio cut-outs

23

media assets with documented licences

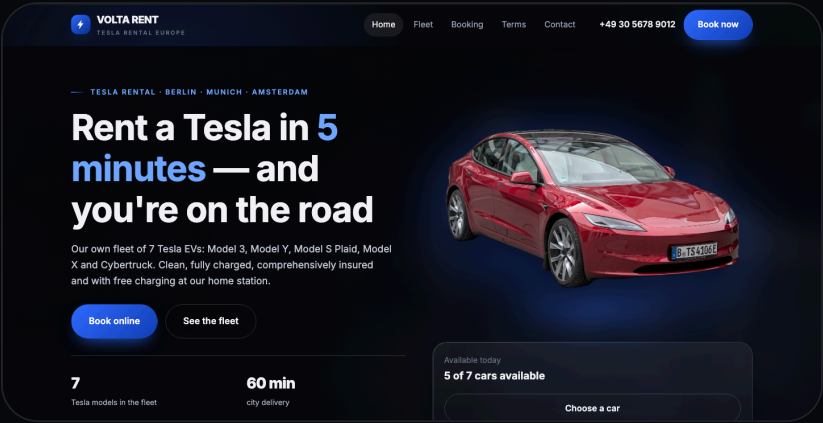

3

short video clips on the site

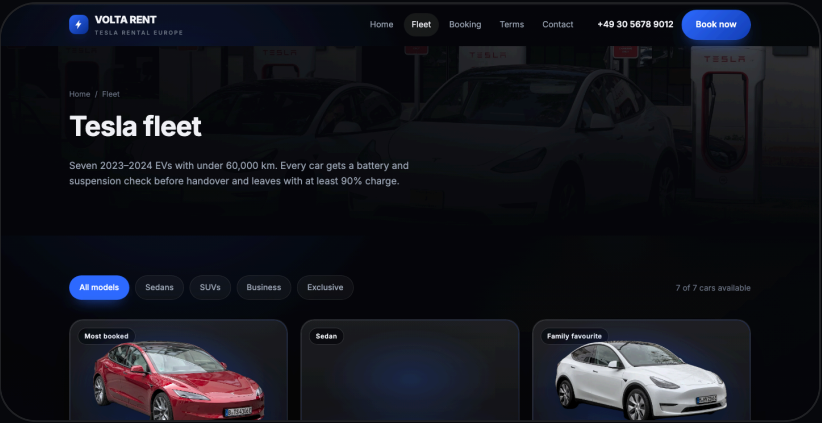

0

frameworks and npm dependencies

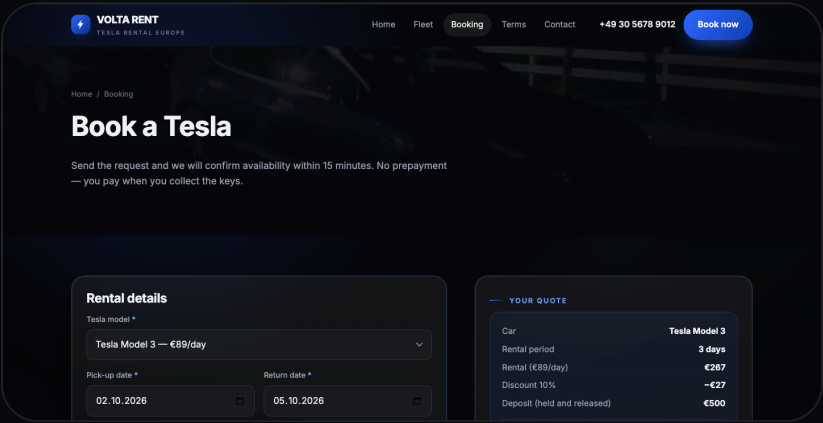

Stack: hand-written HTML, CSS and vanilla JavaScript · **Weight:** 18 MB with all media, 3.3 MB of code and images · **Works offline** from a local folder, no server required.

BOOKING

CONTACTS

Goals

The brief was collected from the client's requests and turned into a short, measurable set of goals.

01

Sell without phone calls

Let a customer pick a model, see the exact price for their dates and send a booking request online, 24/7.

02

Transparent pricing

Euro prices with 19% VAT included, deposit and discounts visible before the request is sent — no hidden charges.

03

Premium dark brand

A calm, cinematic look that makes seven electric cars feel like a fleet worth flying for.

04

Easy for the owner to update

Plain files: prices and copy live in readable arrays and HTML — editable without a developer or a build pipeline.

Booking requests

Primary conversion — a submitted request with dates and contacts.

Mobile share

More than half of the traffic is expected from phones; layout is built mobile-first.

Scroll to rates

How many visitors reach the price table — the clearest sign the offer is understood.

Time to request

Landing → submitted form. Target: under two minutes with the calculator.

CM • 0-100 IN 2.1 S • FREE SUPERCHARGING • DEPOSIT FROM €500 • DELIVERY IN 60 MINUTES • FREE CANCELLATION • BERLIN

Audience & scenarios

Business traveller

Lands in Berlin, needs a car in an hour

Books a Model S Plaid or Model X for airport pick-up, expects an invoice with VAT and a named driver on the policy. Cares about status, speed and zero paperwork.

Family & tourists

Long weekend, 500 km of countryside

Takes a Model Y or the 7-seat version. Needs range confidence, child seat, unlimited mileage and a clear answer on where to charge.

Creators & events

Shoot on Saturday, wedding in June

Rents a Cybertruck or Model X with Falcon Wing doors for a few hours. Needs a car that photographs well and an operator who delivers on time.

What it means for the UI

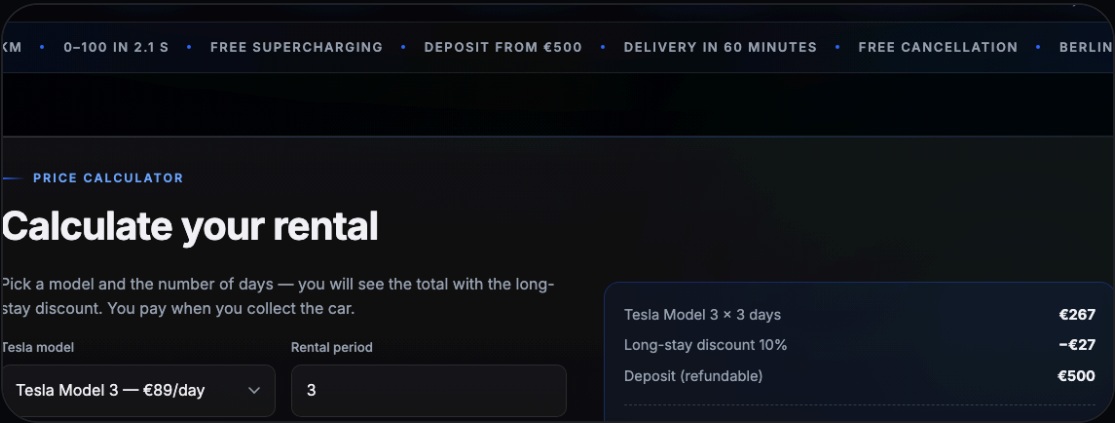

- ✓ **Prices and deposits** are always visible, also in the fleet cards.
- ✓ **Airport delivery** and city delivery are separate options with fixed prices.
- ✓ **Range, seats and drivetrain** are shown as scannable chips, not paragraphs.

Language & market

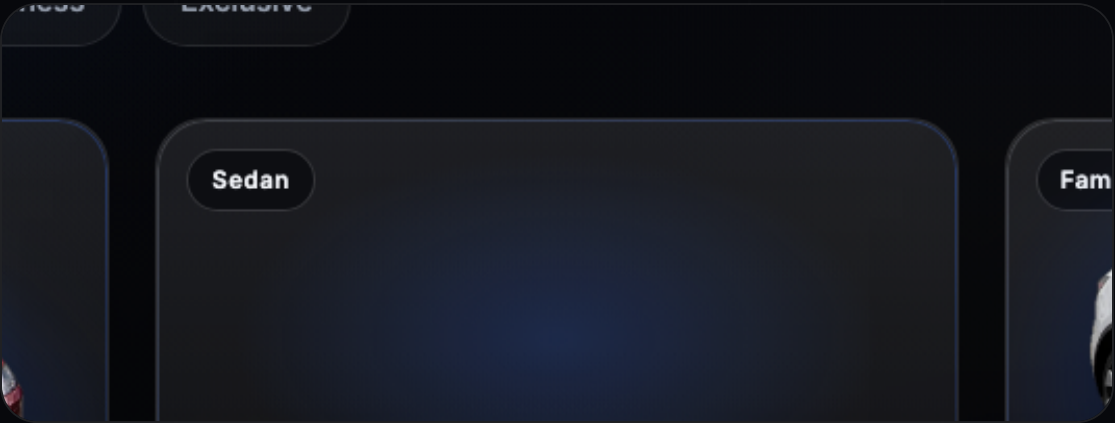

- ✓ English copy, **EUR** prices, EU/EEA licence rules and 19% VAT.
- ✓ Cities: **Berlin, Munich, Amsterdam**; airports BER, MUC, AMS.
- ✓ Cross-border travel inside the EU is allowed and explained in the FAQ.

Functional requirements

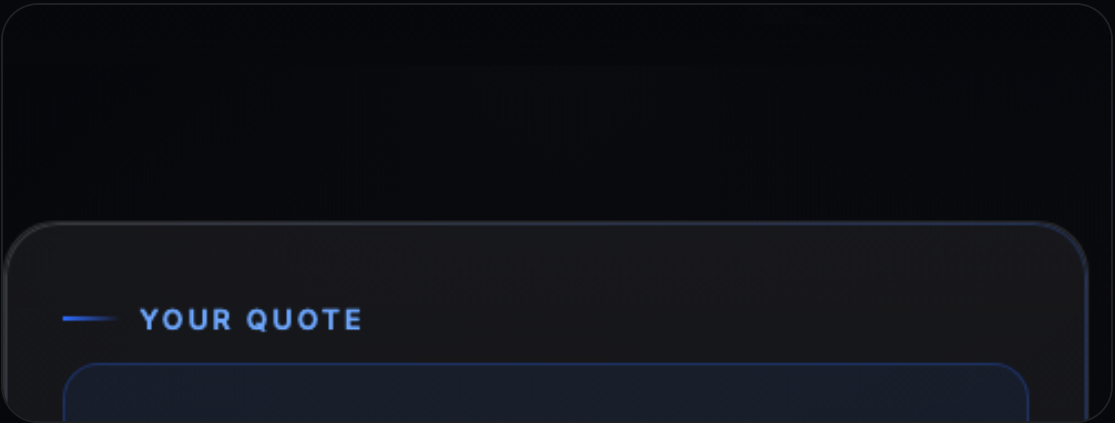

- ✓ **Price calculator** — model × days, automatic long-stay discounts, extras.
- ✓ **Fleet filter** — sedans, SUVs, business, exclusive, with a live counter.
- ✓ **Booking form** — live quote, extras, date and phone validation, booking number.
- ✓ **Gallery** — real photos of interiors, details and charging.
- ✓ **FAQ accordion** — charging, documents, cross-border travel, corporate rental.
- ✓ **Contacts** — delivery zones, airports, opening hours, company details.
- ✓ **Reviews & social proof** — rating and three customer stories.
- ✓ **Video block** — three short clips, muted, autoplay-on-visible, with posters.
- ✓ **Fallbacks** — cut-out → photo → vector illustration if media is missing.
- ✓ **Consistent header & footer** on all four pages, sticky navigation.

FLEET FILTER

LIVE QUOTE

Non-functional requirements & constraints

Responsive 2560 → 390

Fluid container 1200 → 1320 → 1480 px, car cards and galleries reflow, hero collapses to one column below 900 px.

No backend

The site is static; the booking form validates and stores the request in the browser, structured so a CRM or Telegram bot can be plugged into one handler.

Licence-clean media only

Every photo and clip comes from Wikimedia Commons or Mixkit with a documented licence in **credits.json**.

Accessibility

Semantic markup, visible **:focus-visible** rings, keyboard-friendly accordion, and all motion disabled under **prefers-reduced-motion**.

Performance budget

Lazy media, 800 px thumbnails via **srcset**, hero preload, video **preload="none"** with posters to avoid layout shift.

Maintainability

One CSS design system, one JS file with data arrays (models, extras, discounts), one README with a replacement checklist.

No CMS

Seven models and six extras live in one readable array; the owner can change a price in a text editor and reload the page.

No tracking scripts

Nothing third-party is loaded: only Google Fonts for Inter, with a system fallback. Analytics can be added deliberately later.

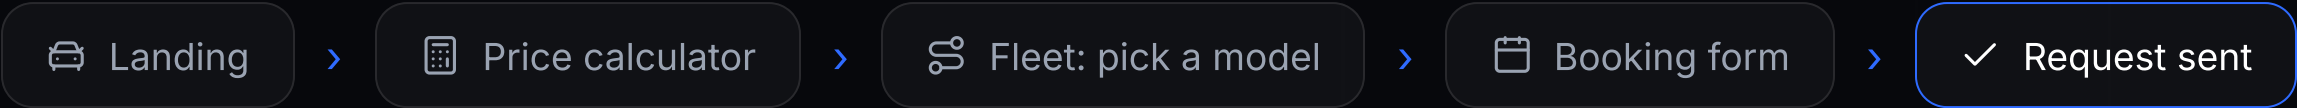

No fake urgency

No countdown timers or “2 cars left” pressure — the only live number is the genuine availability card in the hero.

Site structure

Home Hero · price calculator Why us · popular models · steps Rates · terms · reviews Gallery · video · FAQ · CTA	Fleet Class filters + counter 7 model cards with specs Comparison table Gallery · CTA	Booking Rental details + extras Sticky quote panel 3-step explanation Success screen with booking number	Contacts Phone, Telegram, email, office Delivery zones & airports Message form Company details
---	--	---	---

Main user journey

Navigation keeps four destinations visible at all times; every page ends with the same booking CTA, so a conversion is never more than one click away.

Colour & typography

gradient · primary

Type scale — Inter

Rent a Tesla

Section heading · 32/40

Body text · 17/26 — comfortable reading on dark glass surfaces.

EYEBROW · 13 / 0.14EM

Rules

- ✓ **Blue is action.** Accent only on buttons, links, active chips and numbers.
- ✓ **One accent per screen** — the car photo and the CTA never compete.
- ✓ **Negative tracking** on headlines (−0.02...−0.04em) for a modern, dense look.
- ✓ **Contrast:** body text on background $\geq 7:1$, muted text $\geq 4.5:1$.

Deposit (refundable) **€500**

Total for the rental **€240**

Video card

Poster, caption chip and a play/pause control that follows scroll visibility.

Cars without background

Studio-style cards instead of stock photos: every model is cut out from a real photo and placed on a dark panel with a blue shadow and glow.

BEFORE · Model Y 7 seats

BEFORE · Model X

BEFORE · Cybertruck

AFTER · Model Y 7 seats

AFTER · Model X

AFTER · Cybertruck

1 · Find a whole car

The first attempt failed: several source photos were tight crops, so the cut-out inherited a sliced bumper. Edge coverage was measured to catch this automatically (0.72 → 0.07).

2 · Cut with Apple Vision

A small Swift tool runs `VNGenerateForegroundInstanceMaskRequest` offline — no third-party model, no upload, transparent WebP out (75–110 KB each).

3 · Light it

A blurred blue ellipse plus a two-stop **drop-shadow** anchors the car; on hover the shadow deepens and the car lifts 4 px.

Motion that carries the fleet

A continuous strip of all seven models right under the hero, plus a spec ticker, counted-up statistics and pointer-aware highlights.

Model X

Cybertruck

RANGE UP TO 629 KM • 0-100 IN 2.1 S • FREE SUPERCHARGING • DEPOSIT FROM €500 • DELIVERY IN 60 MINUTES • FREE CANCELLATION • BERLIN • MUNICH • AMSTERDAM

Car marquee

14 tiles (7 + a duplicate) scroll seamlessly, pause on hover, each tile links to its fleet card.

Spec ticker

Range, acceleration, deposit and delivery scroll as a thin band and pause on hover.

Count-up stats

Fleet size and delivery time animate once, when the hero enters the viewport.

Respect the user

Every animation is GPU-only (transform/opacity) and switched off under reduced-motion.

Book now

ON THE ROAD

Electric silence, real roads

Three short clips from our drives — sound off, just the cars, the road and the forest.

Behaviour

Muted, looping, **playsinline**. Starts only when the block is 35% visible and pauses when it leaves the screen.

Weight

preload="none" plus a poster frame per clip: 2.7 MB, 4.2 MB and 4.8 MB, nothing loads until it is needed.

Honesty about sourcing

Free-licensed stock footage is credited in **credits.json**. A composite "Tesla driving" clip was prototyped and then dropped: it did not look real enough.

COUNTRY ROAD · 8 SEC · 2.7 MB

AUTUMN FOREST · 8 SEC · 4.2 MB

DRONE VIEW · 6 SEC · 4.8 MB

Layout that scales

From a 2560 px desktop to a 390 px phone — the same components, re-composed. The container grows with the screen instead of freezing at 1200 px.

2560 px

Container 1480 px, 3-column grids, hero 21:9 media band, four-column footer.

1440 px

Container 1200 px, two-column hero with a floating cut-out car and quote card.

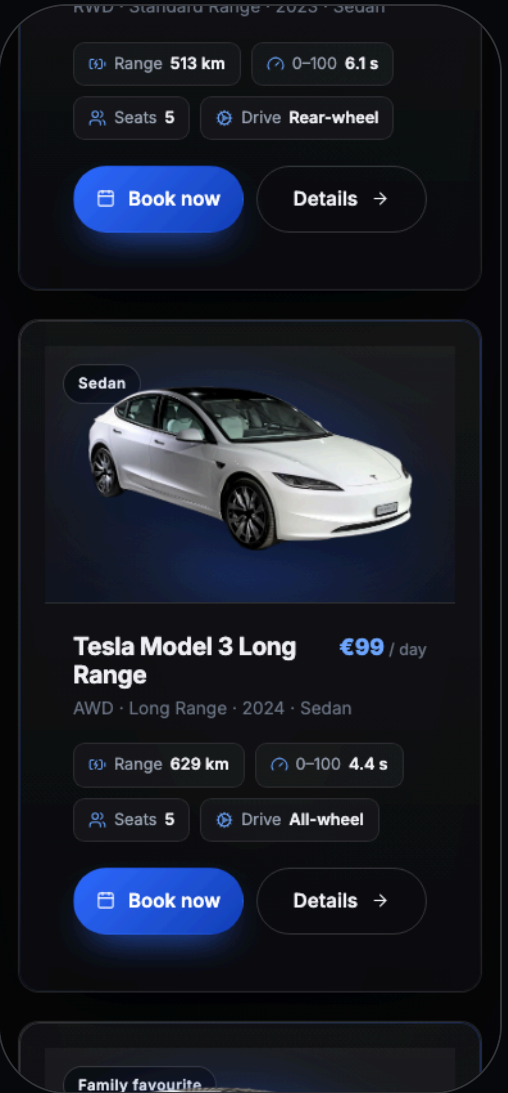

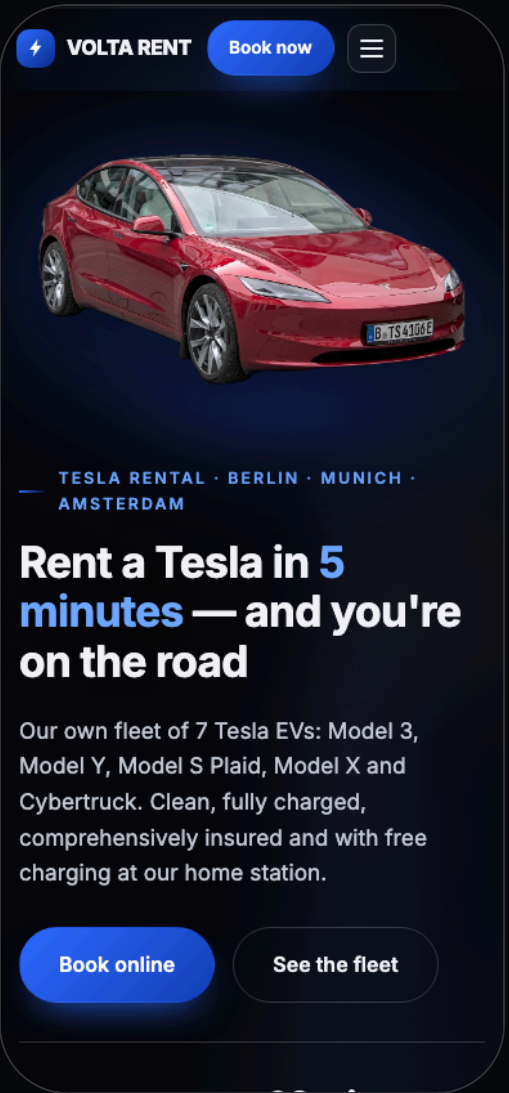

1024 px

Filters wrap, tables become scrollable, page headers keep a photo backdrop.

390 px

Single column, car above the headline, compact header, marquee still full-width.

- ✓ **Fluid container:** 1200 → 1320 (≥1500) → 1480 px (≥1900).
- ✓ **Images:** 800 px thumbnails in **srcset** for phones, 1600 px for desktop.
- ✓ **Video:** 21:9 on desktop, 16:9 on phones, always full-bleed.

2560 × 1440

1920 × 1080

1440 × 900

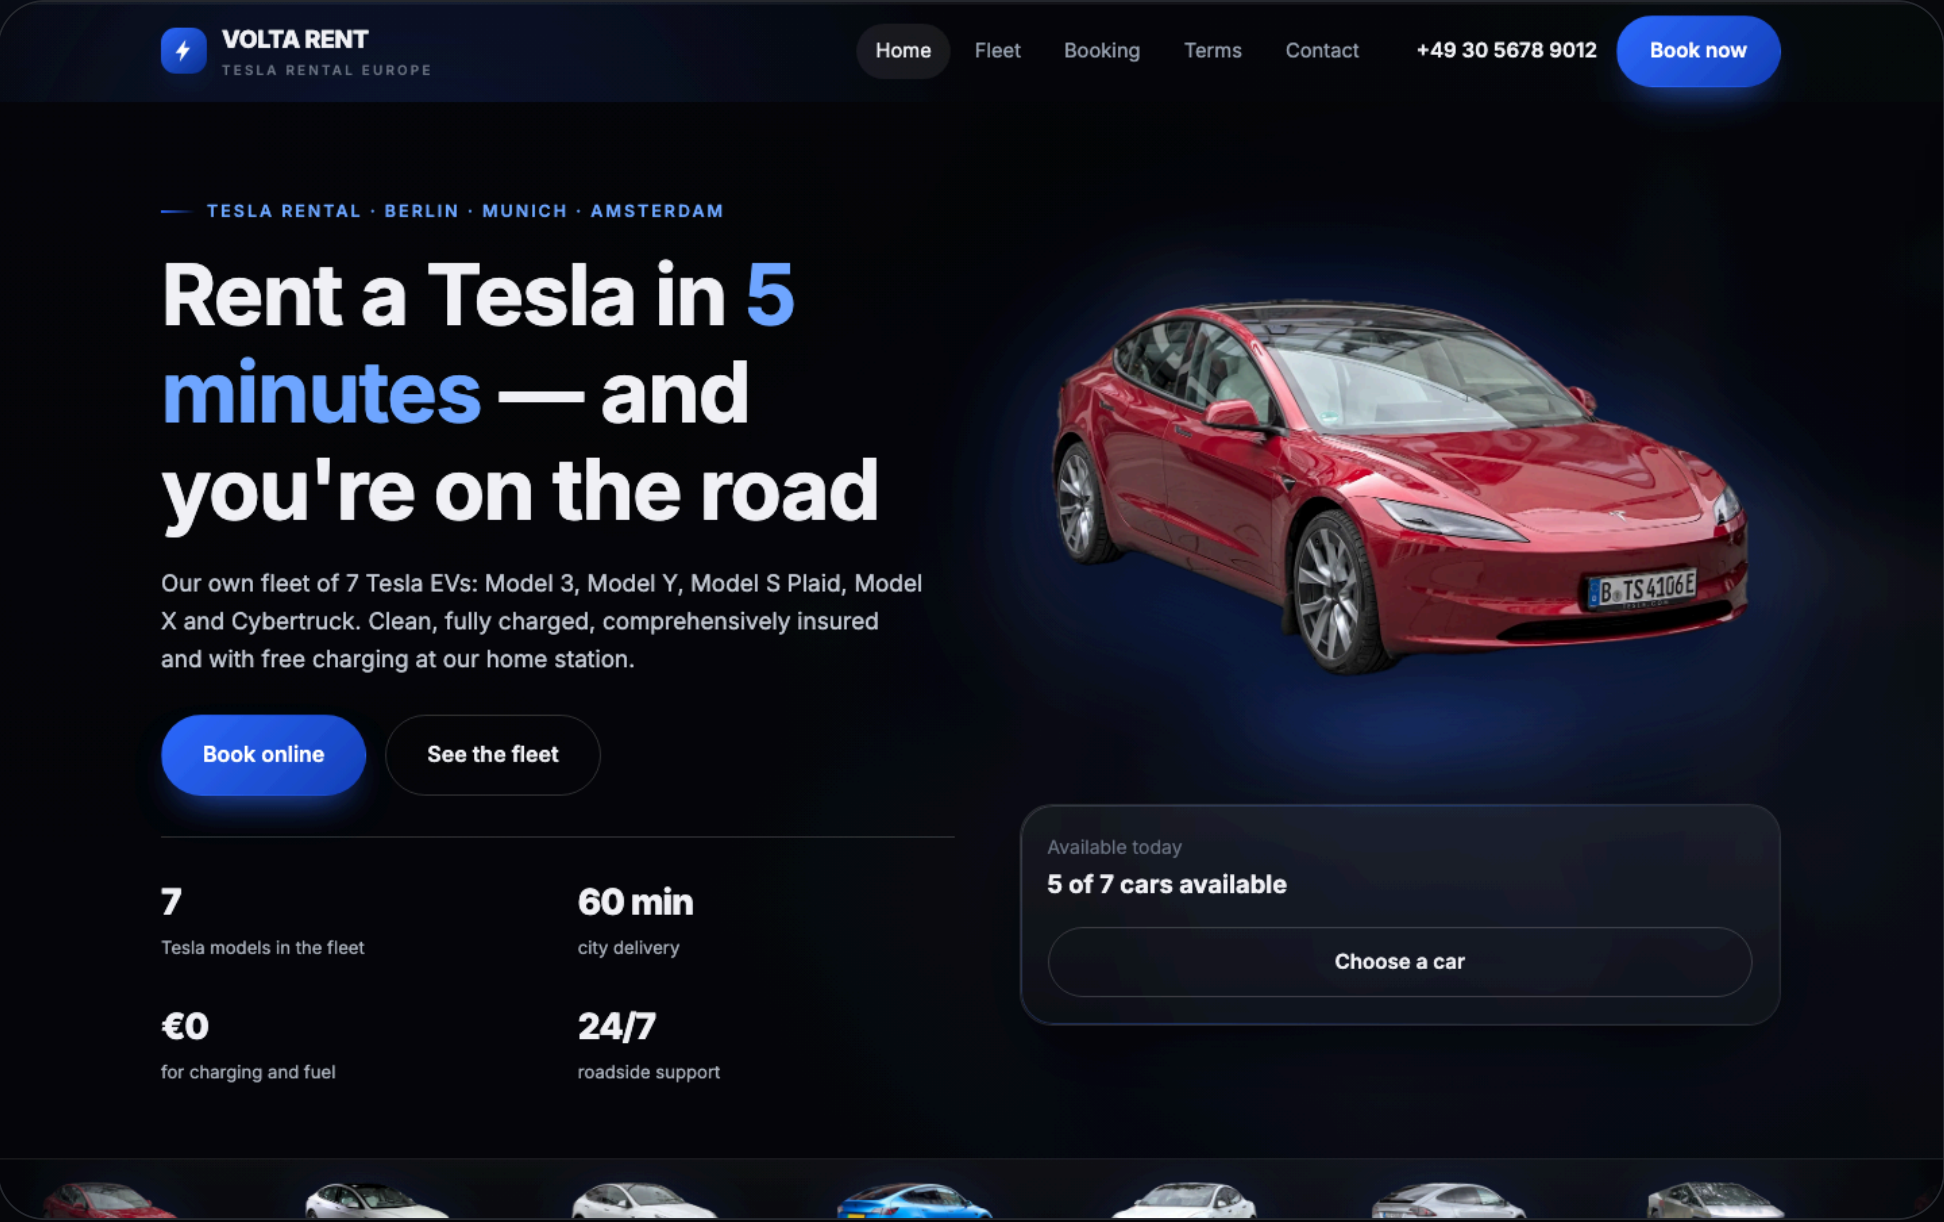

1280 × 800

1024 × 768

768 × 1024

Homepage

Hero

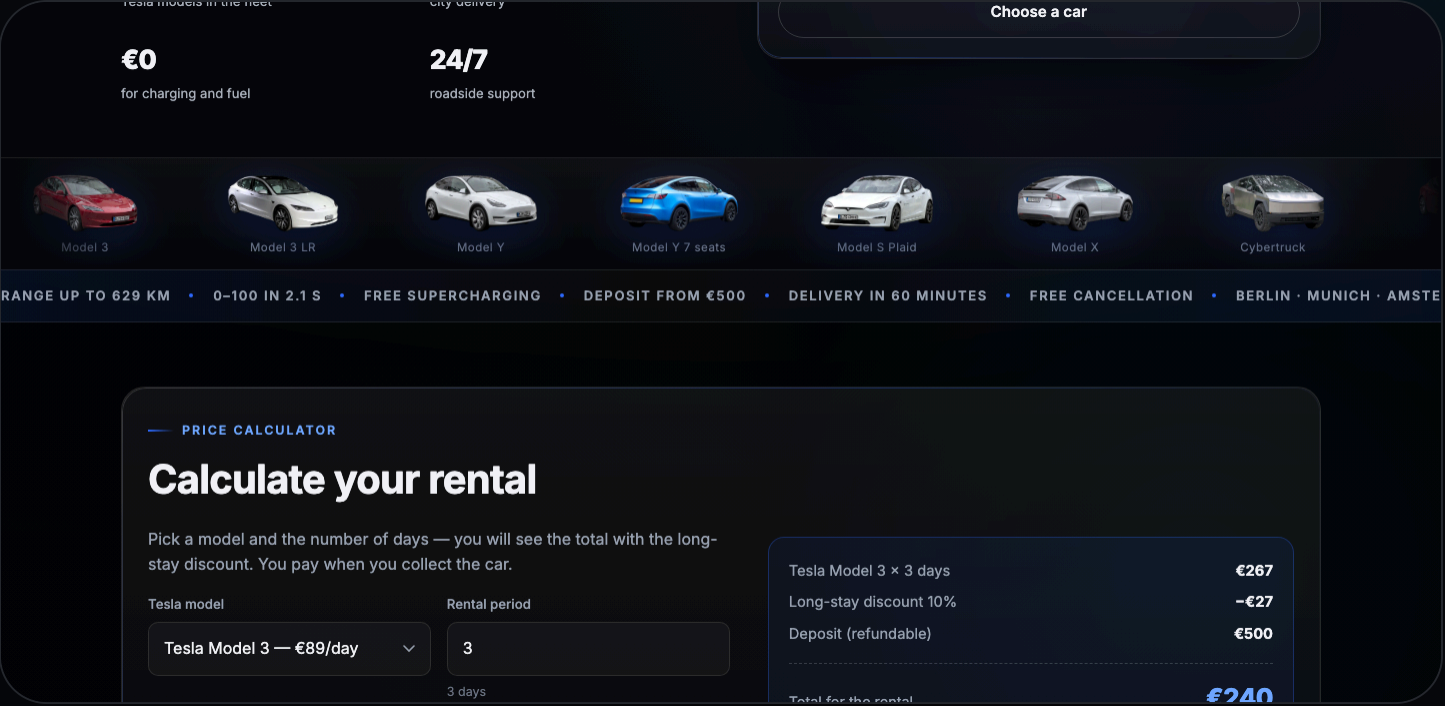

One promise, two buttons, a charged car and the availability card — nothing else competes.

Calculator

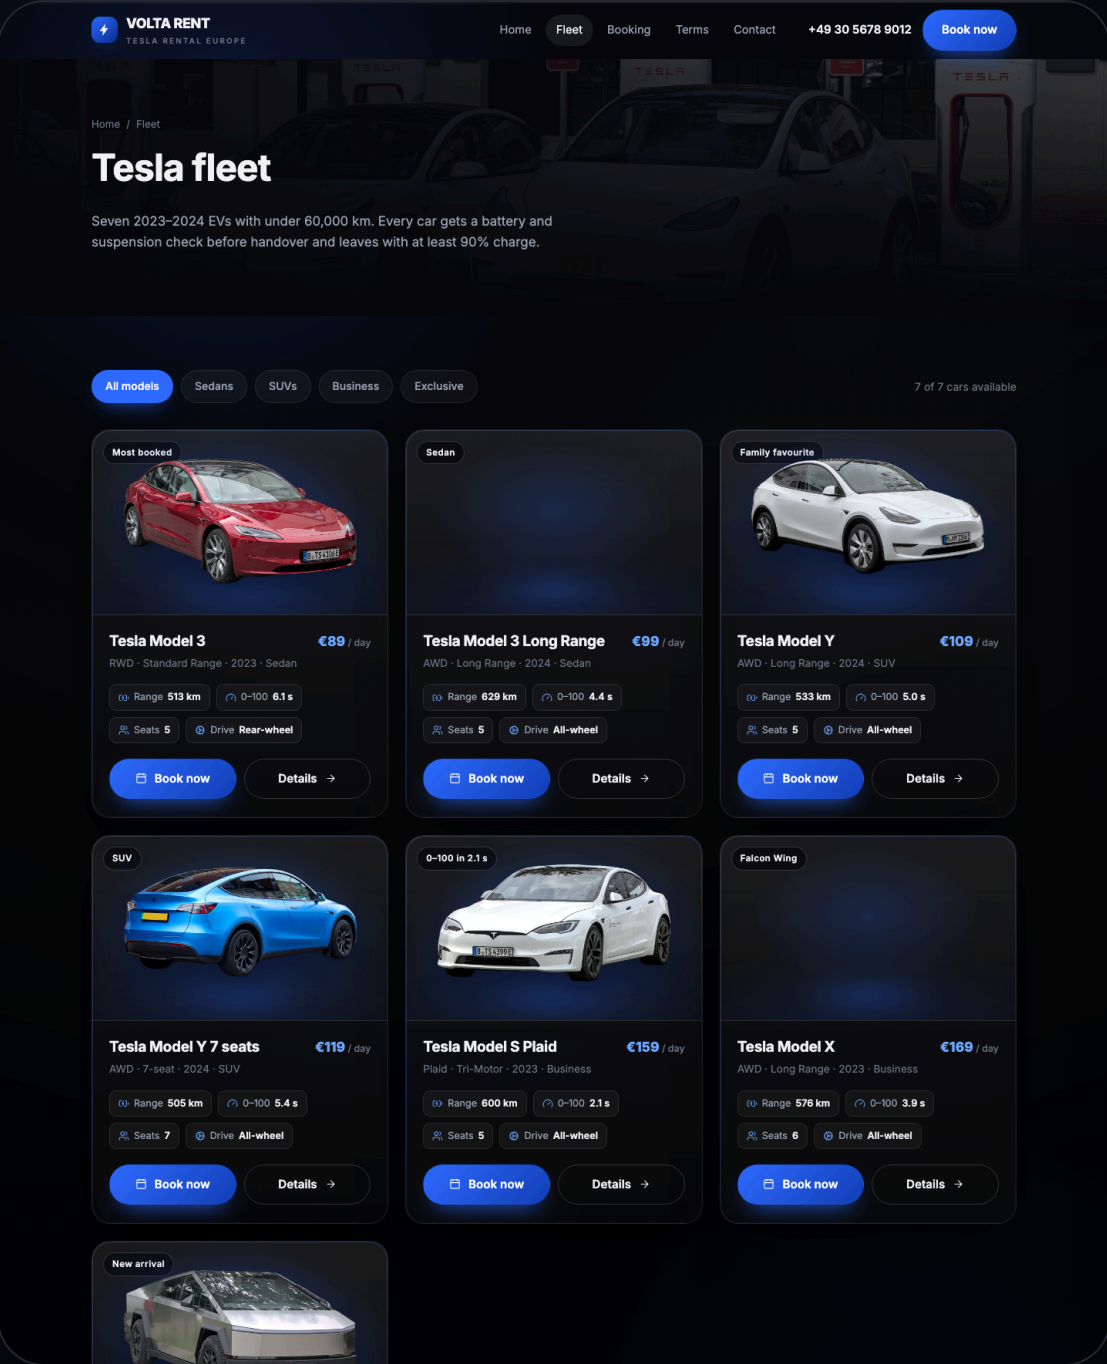

Model and days on the left, the full price breakdown on the right, updated instantly.

Fleet strip

All seven models scroll under the hero as a reminder of the range.

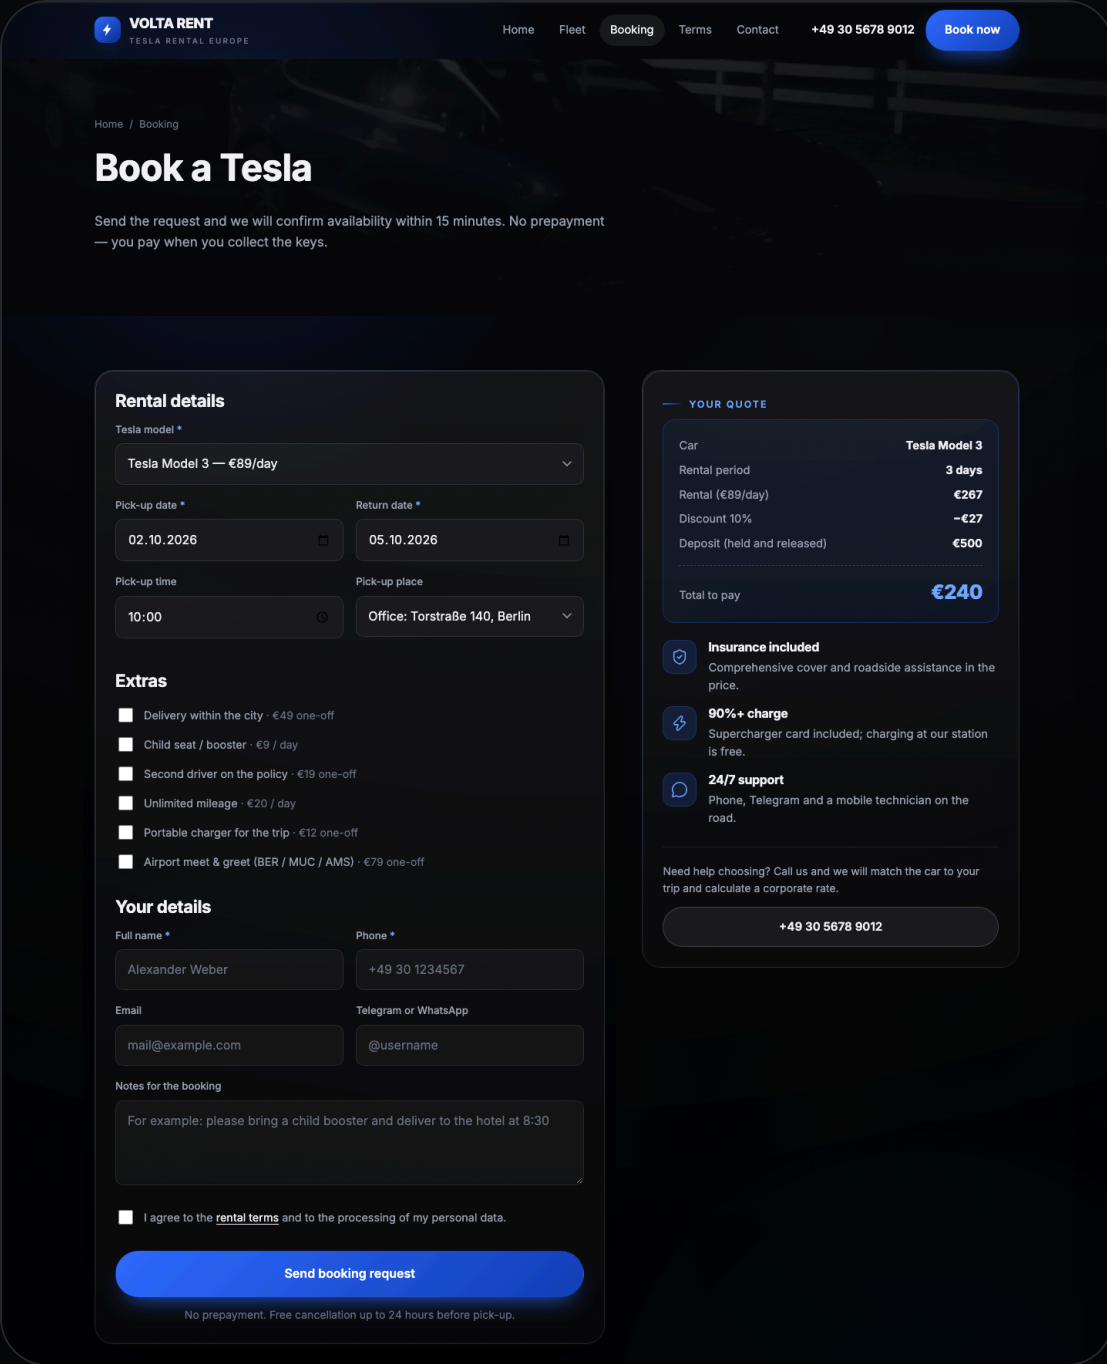

Fleet, booking, contacts

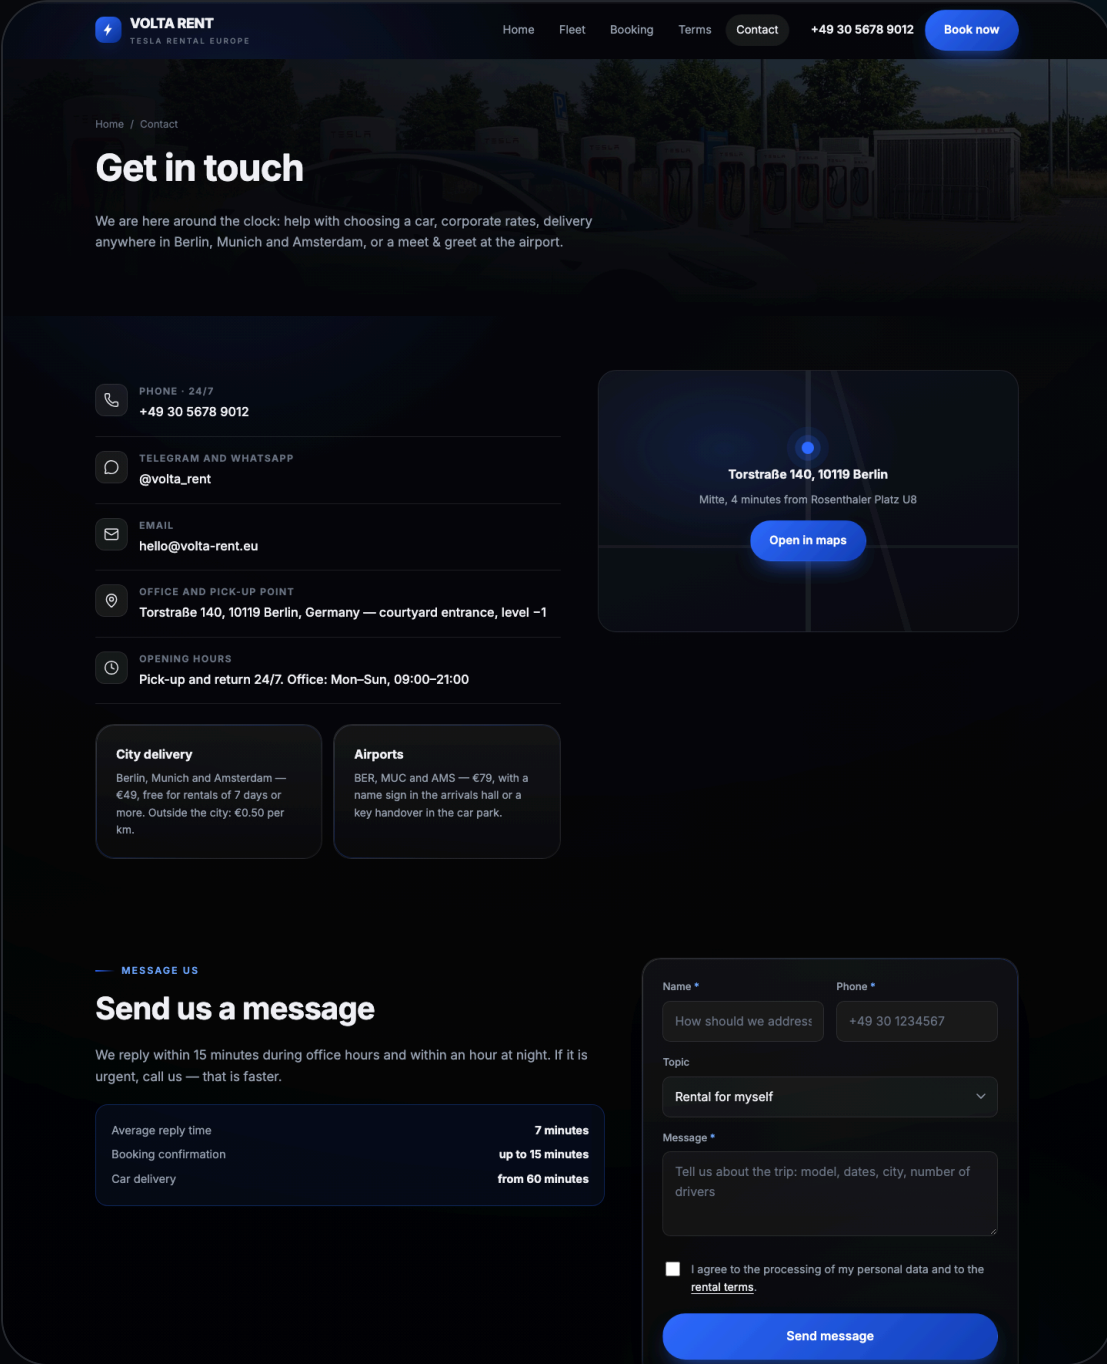

Fleet

Filters by class with a live counter, seven studio cards, comparison table and a second gallery.

Booking

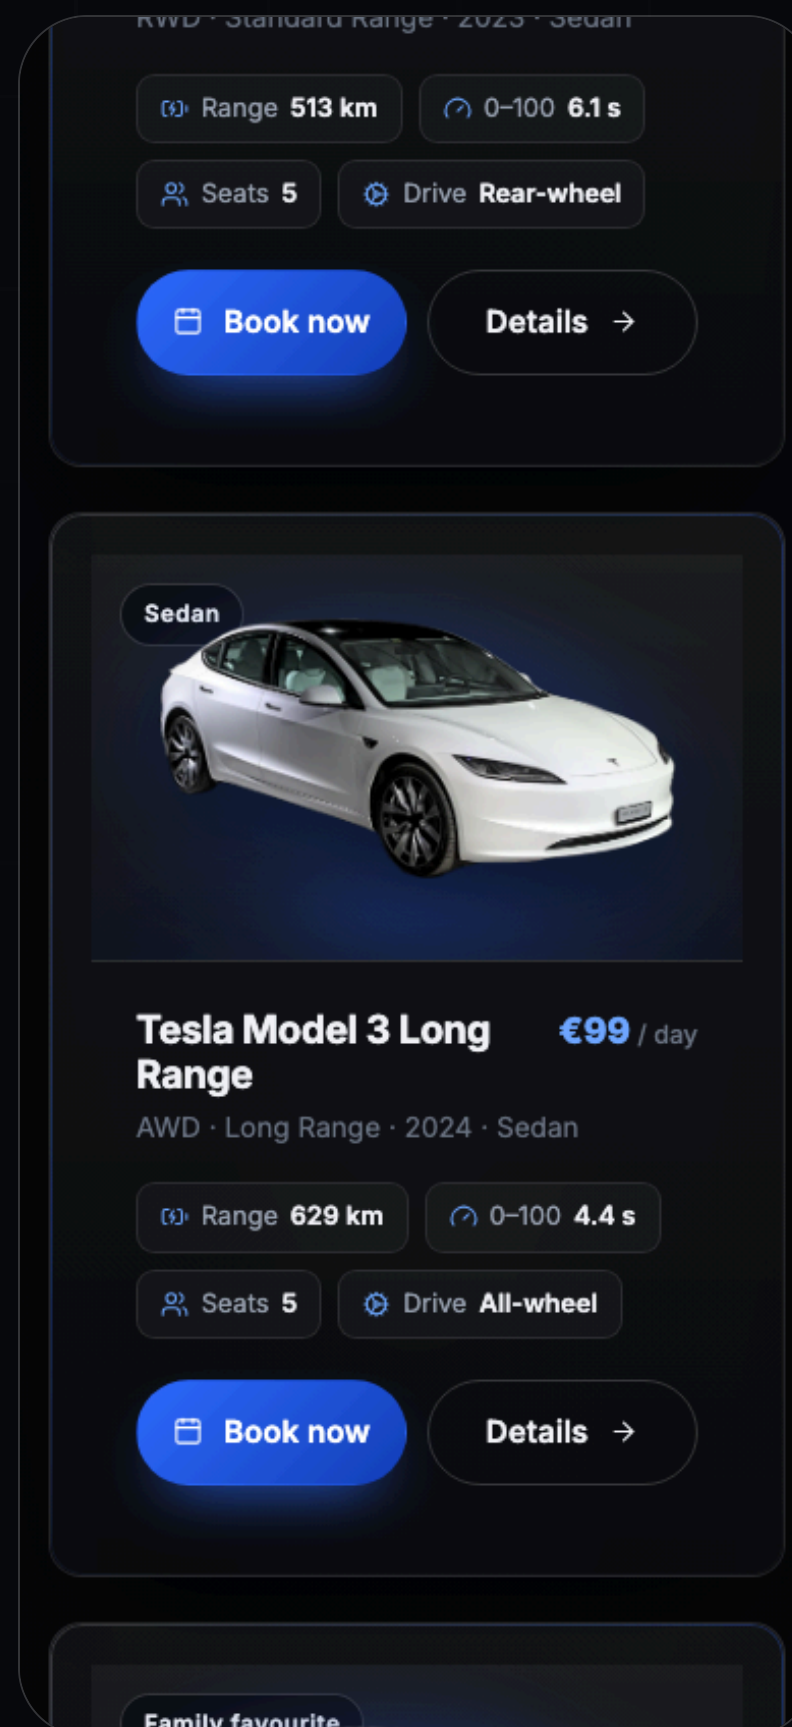

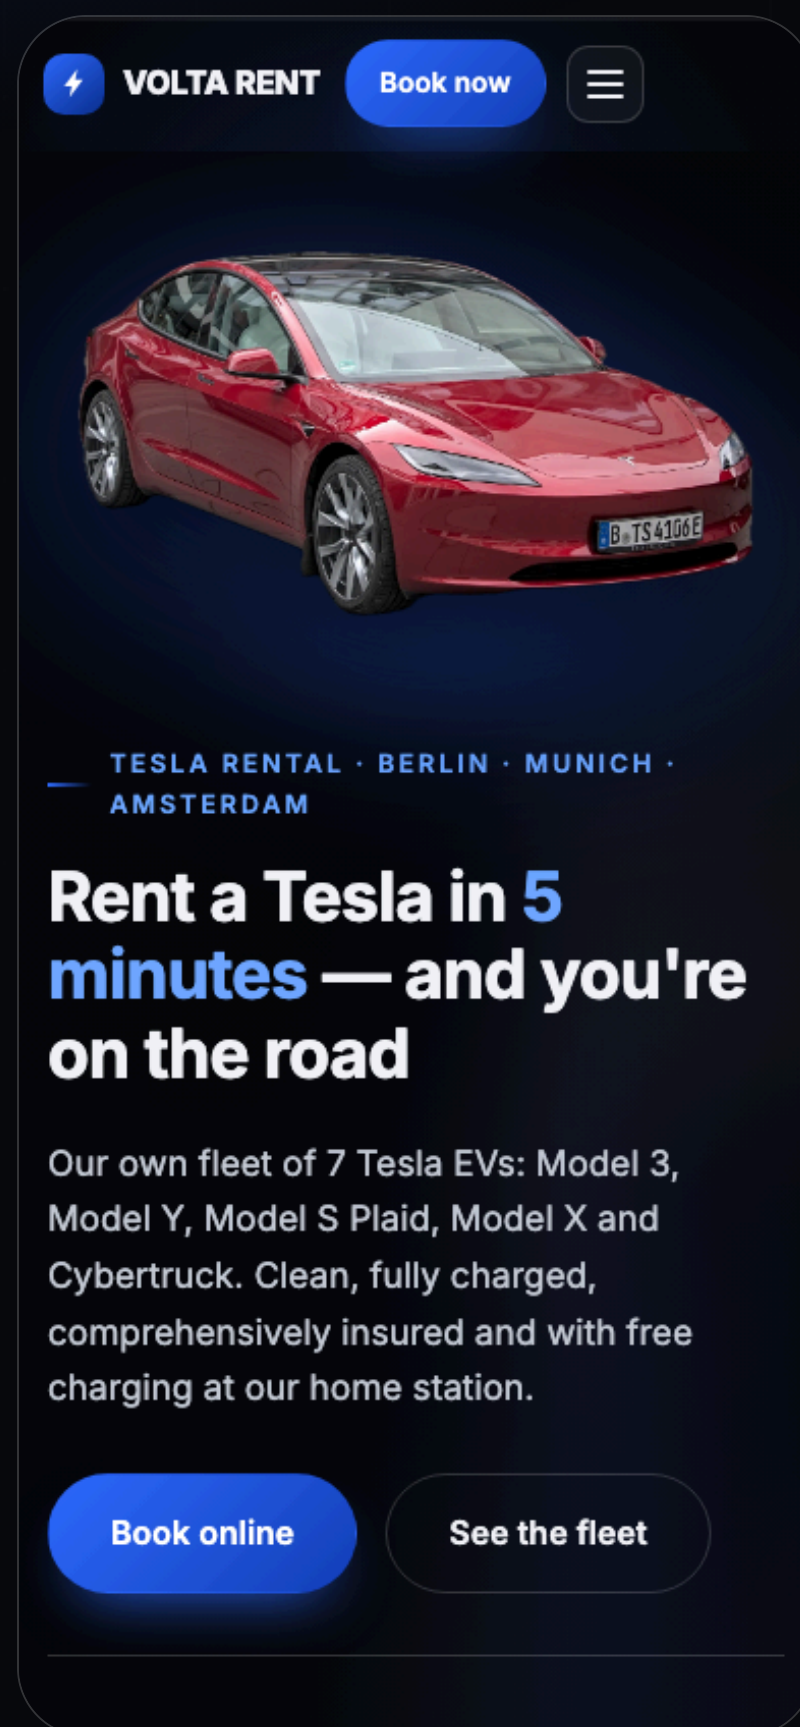

Form on the left, sticky quote on the right, three-step explanation below; success screen with a booking number.

Contacts

Phone, Telegram, office, delivery zones, message form and company details for invoices.

Mobile

Same content, re-composed

- ✓ Car, headline, buttons, stats, marquee — one column.
- ✓ Compact header: logo, single CTA, burger menu.
- ✓ Cards stack with the same cut-outs and blue shadows.
- ✓ Tables scroll horizontally instead of breaking the layout.

Result & next steps

Delivered

- ✓ Four pages in English with EUR pricing and EU rental terms.
- ✓ Seven Tesla models with verified, background-free cut-outs.
- ✓ Calculator, fleet filter, booking flow with validation and a booking number.
- ✓ Motion layer: car marquee, spec ticker, counters, spotlight, scroll progress.
- ✓ 23 licensed media assets, credits file, README with a replacement checklist.

Planned next

- Connect the form to a CRM or Telegram bot for instant requests.
- Shoot the client's own cars and replace the stock photos and clips.
- German and Dutch versions with a language switch.
- Analytics, SEO metadata per model page and A/B tests on the hero CTA.
